

Subjective Questions

1. Which are the top three variables in your model which contribute most towards the probability of a lead getting converted?

Answer:

LeadOrigin_Lead Add Form:

- Positive contribution
- If the origin of the lead is adding form by lead, higher the probability of the lead converting into a customer
- Sales team should focus on such leads.

CurrentOccupation_Working Professional:

- Positive contribution
- If the lead is Working Professional, chances are they will take up another course which is already designed for them.
- Sales team should focus on such leads.

LeadSource_Welingak Website:

- Positive contribution
- If the source of the lead is a Welingark Website, then there is a higher probability that the lead would convert.
- Sales team should focus on such leads.

2. What are the top 3 categorical/dummy variables in the model which should be focused the most on in order to increase the probability of lead conversion?

Answer:

Again, below are the top three categorical/dummy variables that should be focused the most in order to increase the probability of lead conversion :

- a) Lead Add Form (from Lead Origin)
- b) Welingak Website (from Lead Source)
- c) Working Professional (from Current Occupation)

- 3. X Education has a period of 2 months every year during which they hire some interns. The sales team, in particular, has around 10 interns allotted to them. So during this phase, they wish to make the lead conversion more aggressive. So they want almost all of the potential leads (i.e. the customers who have been predicted as 1 by the model) to be converted and hence, want to make phone calls to as much of such people as possible. Suggest a good strategy they should employ at this stage.**

Answer:

- Target leads that spend a lot of time on X-Education site (Time Spent on Website).
- Target leads that repeatedly visit the site. However they might be repeatedly visiting to compare courses from the other sites, as the number of visits might be for that reason. So the interns should be a bit more aggressive and should ensure competitive points where X-Education is better, are strongly highlighted.
- Target leads that have come through adding form from lead origin as they have a higher probability of converting.
- Students can be approached, but they will have a lower probability of converting due to the course being industry based. However, this can also be a motivating factor to ensure industry readiness by the time they complete their education.

- 4. Similarly, at times, the company reaches its target for a quarter before the deadline. During this time, the company wants the sales team to focus on some new work as well. So during this time, the company's aim is to not make phone calls unless it's extremely necessary, i.e. they want to minimize the rate of useless phone calls. Suggest a strategy they should employ at this stage.**

Answer:

- Do not focus on unemployed leads. They might not have a budget to spend on the course.
- Do not focus on students, since they are already studying and would not be willing to enroll into a course specially designed for working professionals, so early in the tenure.
